// ALWAYS UNDER CONTROL

The GClip offers unprecedented secure weapon handling for all policing and undercover operations.

By mounting the GClip, the firearm can be carried on your person in a loaded and cocked state without the risk of accidentally or unintentionally releasing a shot.

The weapon is ready to be drawn and fired with a single-handed motion.

In a tricky situation, this can save lives. With the GClip we make police work and the use of firearms safer!

The perfect add-on: The Safety Stick

The Safety Stick is mounted in seconds without dismantling your weapon or getting your hands dirty.

It provides perfect handling and increases your safety in all standard situations for example during execution of your dry fire drills.

The combination of the GClip and the Safety Stick provides you with total control over your firearm protecting yourself and everybody around you!
